About Me

Student of Management Informatics at Universidade Lusófona. From an early age, I developed a passion for programming and technology, which led me to complete the Professional Course in Management and Computer Systems Programming.

Throughout my academic journey, I distinguished myself through my performance, joining the merit board and receiving awards for my work and dedication. I had the opportunity to intern at the Army Geospatial Center and Axiis, where I deepened my knowledge in software development.

I am a motivated and determined person, always looking for new challenges to grow professionally in the field of informatics. In the future, I aspire to manage and/or create multiple projects, applying my skills in technology and management to develop innovative and impactful solutions.

Trainee
Centro Geospacial do Exercito | Lisbon,Portugal   **2022 – 2022**
                                                                                      2 Months

- Developed platforms using C#, contributing to projects with military significance and practical applications;
- Strengthened teamwork and problem-solving skills within the context of military-relevant objectives;

Education

Bachelor´s Degree in Management Informatics
Universidade Lusófona - Centro Universitário | Lisbon,Portugal   **2024 - Current**

The Management Informatics course equipped me with essential skills to bridge business areas and IT systems. I gained expertise in programming, database management, systems analysis, and data-driven decision-making while enhancing my problem-solving and management abilities to optimize business processes.

Management and Programming of Computer Systems
Escola José Afonso Loures | Lisbon , Portugal   **2021 – 2023**

During the Professional Technical Course in Computer Systems Management and Programming, I developed essential skills in software creation, computer installation and maintenance, and network management. I learned to build desktop, web, and mobile applications, enabling me to work confidently across different platforms and technologies. This journey was instrumental in strengthening my technical expertise and preparing me for the challenges of the job market.

Side Projects

Balloons in line   **Github**
As part of the Programming Fundamentals course, I developed a project called "Balões em Linha", which consisted of a simple game created in Kotlin.

Product - Requester   **Github**
Creation of a website for customers to request products and vote on other products that also spark their interest.

Professional Aptitude Project   **Github**
As part of the Professional Aptitude Project (PAP), I developed a game called Racing Mania as the final project for the 12th-grade course. This project involved creating a dynamic and interactive racing game, with a focus on gameplay, appealing design, and optimized performance.
